3D printer is a transformative machine

“Lost Einsteins”

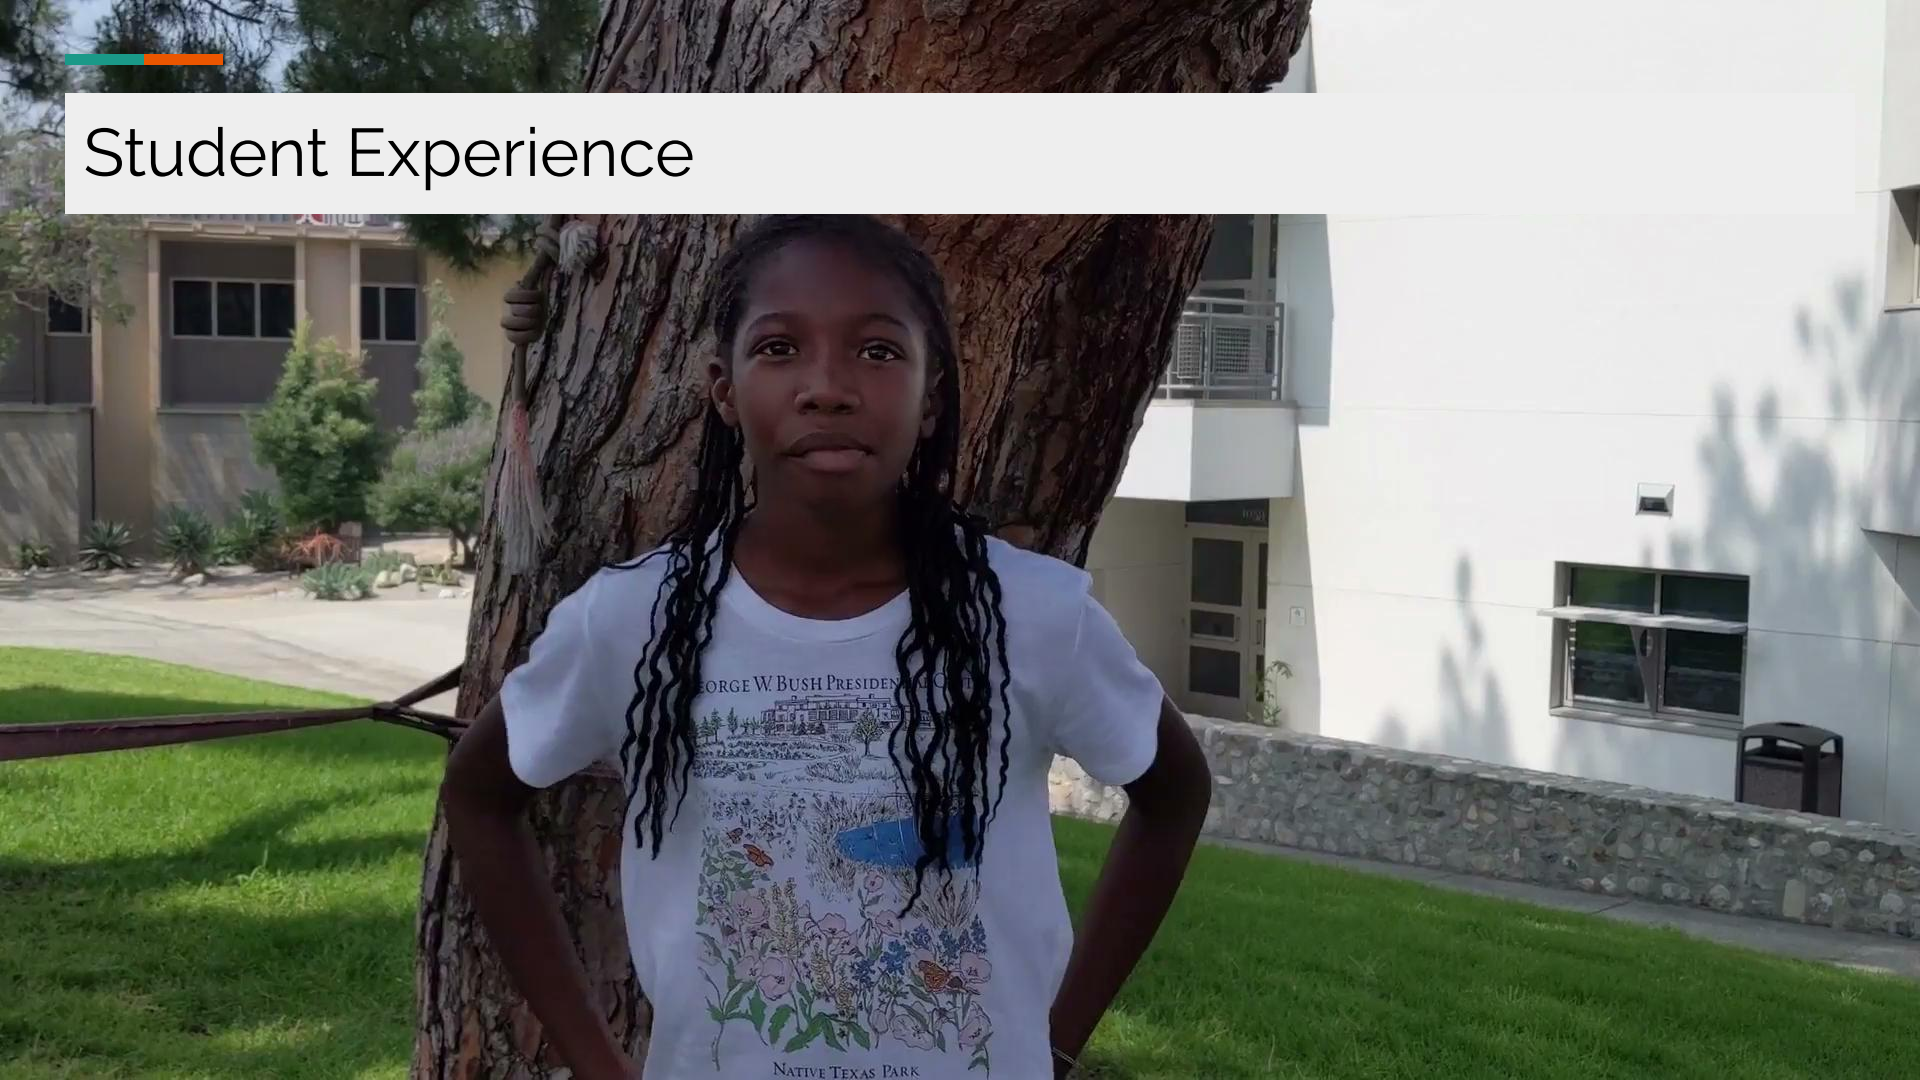

Community Makerspace Events

A photograph of a community makerspace event. In the foreground, a man in a blue t-shirt is kneeling and working on a large, dark, rectangular object, possibly a piece of art or a prototype. A young boy in a maroon shirt stands next to him, looking on. In the background, a woman in a white polka-dot shirt is also visible. The event is taking place in a large, open space with other people and equipment in the background. A red table with various items on it is visible behind the man. A sign in the background says "STAGE".
