

**Title:** When the Wind Doesn't Blow and the Sun Won't Shine

**Team Name:** GAIA Agricultural Technology

**Short Description:** We are focused on the development of agricultural innovation for the advancement of growing crops and raw materials with less obstacles in more confined or restricted areas. We are also determined to exploit and deploy energy harnessed as a byproduct of the Gaia Box grow system for the best use case of the end user. We hope to challenge the boundaries of geographic and environmental restrictions by producing nutritious and bountiful yields of crops, and centers for energy storage by using the novel Gaia Box growth system.
