Inclusive-Maker Mechanism: Building a Positive Community Connection of Plastics-to-Pyrolysis

Team: Helpertunity, Inc. of Apopka, Florida

Description: How can turning waste plastics into portable playhouses, where puppets teach about pyrolysis, at a variety of events under the hot Florida sun, be anything more than just silliness and fun? When engaging in that *maker-mechanism*, one by one, is exactly what's getting the climate & clean energy *cultural-transition* work done!
