

**Team Evergreen Innovative Alliance:** A collaboration between FMS Global Strategies, founders of the **The WA Build Back Black Alliance (WBBA)** & **VertueLab**.

Together we combine existing, effective grassroots organizing efforts toward equitable climate action in Washington State with the dozen years of experience of the region’s premier climate technology acceleration organization.

Our Climate Healing and Commitment Program will:

- build trust between previously disconnected partners,
- raise awareness of the potential for economic opportunity through clean energy innovation, and
- set a strong foundation for collaboration within communities of color to harness government funding for equitable clean energy action that responds to the real needs of those communities.

**Through this partnership we will catalyze new opportunities for wealth creation through clean energy innovation in BIPOC communities across Washington State.**
