Torrent Energy is the vital, missing technology step the Hydrogen Economy needs to advance towards Zero CO₂ emissions.

MISSION : The demand for clean fuel is driving the expanding applications of Hydrogen. This, in turn, is creating demand for cleaner and efficient hydrogen production technologies. Torrent will supply decentralized clean hydrogen supply bringing the hydrogen advantages for business, industry, communities, and the environment.

We have a long history of solving industry problems.

CEO : Successful C-level leader, guiding several science-based companies through start-up, to public offerings in environmental sciences, medical devices, biotech & IT. Managed all aspects of market and sales development.

CTO : 40 years of product design, production facility design, build, and operations. Engineering experience in AMD, Intel, ATT/Bell Labs, and International SEMATECH. Developed industrial scale plasma and microwave-based systems.

PhD/Professor in Plasma Physics, 30+ years design, integration and commercialization of plasmas. Developed advanced systems for material processing, hazardous waste, sterilization, ore processing, gasification, sintering, etc. Member of APMI International (powder metallurgy) and has 2 books, 78 peer-review papers, & 6 pending patents.
