

Empowering the next generation of clean energy

Renewable Nations is a STEM-based instructional technology program to help disadvantaged communities nationwide pursue STEM-based, energy-related careers.

EMPEQ aims to reduce greenhouse gas emissions at scale by streamlining energy audits and clean energy projects, powered by the Fast Site Survey™ app.

Backed by decades of research and proven technology, **Renewable Nations** and **EMPEQ** are partnering to put energy data collection and modeling tools in the hands of disadvantaged populations and the future workforce.

**Together, Renewable Nations and EMPEQ can empower
*the next generation of clean energy.***
