CHARGE ANYWHERE

We're developing the world's first aftermarket portable solar charging kit for EVs. Our kits are self installable, compatible with all EVs, can cover your entire commute, and use 100% renewable energy. We're making filling up your electric vehicle easy!

The problems of EV ownership are well known, and we're here to solve them!

- Range Anxiety
- Lack of Charging Infrastructure
- Fossil Fueled Charging
- Lifestyle Aversion
- Electricity Costs

Help us be first to market in an industry that will 10x over the next 10 years!

PRODUCT ROADMAP & VISION

We are bringing an extendable rooftop kit to market in early 2023. This kit can give you an extra 40 miles of range per day just sitting in the parking lot!

We are excited to partner with companies electrifying their fleets and give them custom kits for trucks, vans, and even semis.
