

Brollins's challenge details for challenge: [Solar Prize Round 6](#)

Generated at Tue Sep 27 2022 12:41:30 GMT-0400 (Eastern Daylight Time)

Explanation

Concentrating solar, receivers, concentrating photovoltaic, 2-axis tracking, thermal storage, system integration

Key Needs

- Product Design (4 / 5): Products are conceptual, but not completed
- Fabrication & Prototyping (4 / 5): Final product cost is important, so fabrication is essential
- Testing and Validation (4 / 5): Once completed, the prototypes need to be tested and validated
- Technical Analysis (4 / 5): Product performance and optimization techniques are needed
- Funding & Investments (3 / 5): To make the product market-ready, developmental costs will be necessary

Matches

1. [Circuit Launch](#): 87.93%
2. [Georgia Institute of Technology](#): 87.63%
3. [Solar Inventions](#): 87.50%
4. [GoSun](#): 87.50%
5. [BlochSoft Technologies Inc](#): 87.50%
6. [Swift Coat Inc](#): 87.50%
7. [HomeMe Group, Inc.](#): 87.50%
8. [Coe Student Innovation Center - University of Wyoming](#): 87.50%
9. [Larta Institute](#): 87.50%
10. [IoT Conduit](#): 87.50%
