

Aaron Pace's challenge details for challenge: [Solar Prize Round 6](#)

Generated at Fri Sep 30 2022 18:22:48 GMT-0600 (Mountain Daylight Time)

Explanation

While our development team is staffed to complete our Renewable Energy Data Aggregation Service, additional developers will help us accomplish the project on time. Technical advisors will help us interact efficiently with APIs and other services available that we wish to aggregate.

Key Needs

- Strategy (3 / 5): When the product is complete, we will largely need help in our goto market strategy.
- Product Development (3 / 5): This area is related to software development. Having additional developers and technical advisors will be key to developing our product framework in the best way possible at the outset.
- Software Development (4 / 5): Can certainly make use of additional developers and technical advisors.
- Marketing & Promotion (4 / 5): Related to strategy, getting the product to market can't be done without marketing and promotional materials. This is something where we don't have expertise.
