

There are **5.9 million** commercial buildings in the US, with **97 billion ft<sup>2</sup>** of rooftop space.

But only **3.5%** have solar, due to the **high cost** and **logistical complexity** of a project.

## The Beam Module

Delivered onsite in stacks  
Pre-assembled panel + racking

Integrated panel-to-panel alignment  
features

Unfolds as easily as a folding chair

Beam  
Solar

Pre-fab solar for commercial roofs

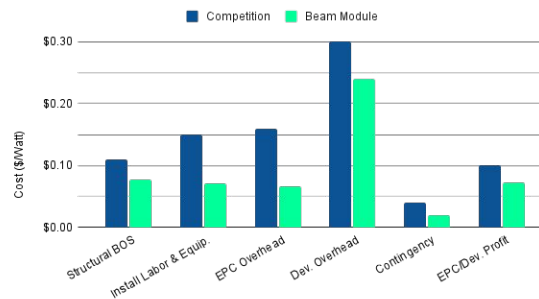

The Beam Module stands out from the competition:

- ✓ No onsite fabrication or assembly
- ✓ Single SKU for all installations
- ✓ Integrated grounding and wire management
- ✓ Folds flat for shipping

Which means:

- ✓ 4.8x faster installation
- ✓ Faster design and permitting
- ✓ Simpler onsite logistics
