

Advancing Climatetech &
Clean Energy Leaders

Greentown Labs' mission is to build an inclusive community that convenes, connects, and inspires entrepreneurs and ecosystems to advance climate solutions.

Browning the Green Space's mission is to increase the participation and leadership of Black and Brown people in the clean energy space and beyond.

ACCEL combines acceleration with a curated curriculum, incubation through a Greentown Labs membership, and extensive mentorship from Greentown and Browning the Green Space's networks of industry experts.

This program builds on elements of Greentown Labs' successful Greentown Go (formerly Greentown Launch) accelerator program and Browning the Green Space's expertise in company building and supporting founders within disadvantaged communities.
