

# The Plan

## We provide:

- Affordable, tiered, membership-based access to industrial shops, tools, & equipment crucial for product development, prototyping, & manufacturing.
- Modular adult vocational & entrepreneurial classes & workshops discounted to members, & available to the general public.
- Affordable office & industrial work spaces available from month-to-month, to multi-year leases with all-in-one rent.

The WorcShop is the largest industrial makerspace & business incubator on East Coast catalyzing a vibrant, innovative community.

- It is extremely **DIFFICULT** for most people to gain access to industrial tools & equipment for personal or commercial use.
- There are **VERY LIMITED** affordable & / or flexible vocational training opportunities.
- It is extraordinarily **EXPENSIVE** to develop products & start companies in order to manufacture those products.
