

# DOE EPIC Prize Competition - FedTech Submission - Texas GridTech Accelerator

## MVP

The Texas GridTech Accelerator program focuses on growing technology ventures that offer solutions to reduce strain on the energy grid in rural and disadvantaged communities in Texas.

## Implementation

Will occur on a scaled basis, starting with the identification of a handful of communities and ventures and growing with the competition. Then a pairing and customized Accelerator process will begin including, mentorship, education and exposure to stakeholders.

## Organization

FedTech has worked with hundreds of founders, federal lab inventors, and mentors through our accelerator programming that has been funded by DOD, NASA, DOT, NIH, BARDA, and DOI.
