

## Mission

*Our mission is to restructure the energy economy through innovations across all climate verticals and emerging spaces. We aim to be a leading center of global collaborators working to build technologies and new ventures to decarbonize and develop renewable energy.*

## Plan for Implementation

*We've assembled a dedicated stakeholder group across CT and plan to build a comprehensive climate tech startup space in partnership with MakeHaven in downtown New Haven, CT.*

### Startup Space

Electronics labs, fabrication labs, wet labs, office space (initial 9,100 ft<sup>2</sup> space with potential to grow to 100,000 ft<sup>2</sup>)

### Programming

Accelerators, jobs boards, pitch events, networking events, summits, talks/panels, and land + water testing
