

IDEAFOUNDRY Energy Innovation Incubator

Using local solutions to solve global climate change challenges by catalyzing the commercialization of energy innovation in Southwestern Pennsylvania and deploying it from our own backyard to communities across the globe.

Program Breakdown

The pool of early or non-commercialized Southwestern PA energy innovation found in universities, labs, and other sources

Idea Foundry's time-tested, multi-stage evaluation process

Selection of cohort participants and development of individualized Work Plans for the Energy Innovation Incubator

Phase 1: In the Energy Innovation Incubator, innovators will receive 3 months of hands-on business development services, giving them the commercialization support from our team of experts to balance the technical knowledge and innovation of the startup team. Phase 1 supports local job creation and the SWPA region's efforts to develop a more sustainable community.

Phase 2: Select participants may go on to the Innovation Seeding stage where the Idea Foundry team and our network of global partners will support the deployment of innovation through licensing or other agreements in order to generate global impact. Phase 2 supports the global fight to mitigate the effects of climate change through the efficient use of innovation to solve global challenges.
