

Accelerating the Underestimated and the Overlooked

Creating value at the intersection of opportunity

Targeted Opportunity

- Historically Black Colleges & Universities, Black Churches, and Multiunit Facilities, have low credit risk and need lower cost power.
- eStations are needed due to EV deserts in target communities and range anxieties between these communities

Targeted Founders

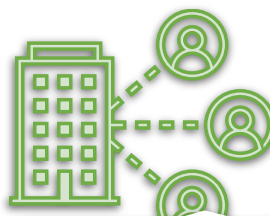

- Using feeders to source underestimated founders leading climate tech and proptech firms with a product needing a pilot
- Long-term, geographically diverse pilots with multiple use cases to provide opportunities for head-to-head competition for their product.

Universities

eStations

Multiunit facilities

Churches
