

WHEATON SUSTAINABLE INNOVATION ZONE

Green Talent Coalition

We believe people are the world's most vital green economic resource, and through the WSIZ Green Talent effort, we're working to invest in education, research, technical innovation, and to develop leading-edge entrepreneurial and workforce skills.

This coalition, consisting of business, government, and nonprofits will focus on recruiting underrepresented youth and adults for the Clean Energy market to address the gaps in green training in under-resourced communities.
