

EMBRYIA

Transforming the solar industry,
one EPIC startup at a time.

Technology startups need more than just funding to successfully launch, grow, and scale their innovations.

Our goal is to create a supportive environment where entrepreneurs can thrive and bring their ideas to life, ultimately leading to a more sustainable future for all.

We play a critical role in providing entrepreneurs with the resources they need to succeed, such as mentorship, technology validation, business development, and connections to manufacturers.
