# GridBoost

# Proactive Community Solar Development

**Project Summary**

**Vision:** A software platform for developers and communities that Reduces Solar soft costs & risks

**Mission:** We aim to reduce siting costs, improve quality of sites, reduce the project risks, and increase the success rates for developers and communities. We are innovating project site discovery with a **proactive** approach that brings financial viability and community impact into an automated and scalable platform.

**Revenue Model:** we will monetize our platform by selling qualified commercial solar leads, licensing access to our platform, and selling our dataset via API integrations with Finance and Tax equity platforms

Automate Qualified Solar Site Identification

&

Customer Outreach In Underserved Communities

Automate Substation Proximity

&

Confirm Power Capacity Available

**Project Impact**

Reduce solar **soft costs**, reduce **risks** for developers, and expand solar into **new markets**
