U.S. DEPARTMENT OF ENERGY

Organization Overview

- *Tribal Solar is a new Woman and Native American Owned small business that is new to community solar development but with experienced management with successful track records.*

Project Overview

- *Tribal Roofing is dedicated to developing two separate 0.5 MW_{DC} community solar projects in rural Oklahoma or on Tribal lands.*

Meaningful Benefits

- *Our goal is to deliver discounted electricity (20% below market rates) to low to moderate – income households.*
- *Provide a working lab (our solar array) to help educate the next generation of green economy workers. Each project will partner with local schools to allow students access to vocational training in installing and maintaining solar arrays, but also foster business education for students in project management, solar sales, accounting and other disciplines necessary to operate a successful solar company.*
