Commercializing National Lab Technologies

Today's Ecosystem Problems

In 2022, only 1.9% of VC went to women founders, 1.5% to Latinx founders, and 1% to Black founders

The National Labs receive \$12B in federal funding annually, producing 2000 inventions/year. But only 20-25 start ups spin out of the labs each year

LabStart Ecosystem Vision

Women and BIPOC entrepreneurs have equitable access to the capital providers, cutting edge climate technologies, and industry partners needed to launch a breakthrough climate or clean energy startup
