

BIOFUELS FOR PROGRESS

Team Lead: David Blume - CEO of Whiskey Hill Farms, Energy and biofuels expert, Author of "Alcohol Can Be A Gas!"

Team Member 2: Randall Scott W. - Project manager, community engagement specialist, managed national DOE project for disadvantaged communities

Team Member 3: Mark Fitz - CEO of Star Oil Company, a leading expert in biodiesel and petroleum markets, technology

GOAL 1: Develop and implement a pilot program for the installation of low-cost fuel conversion kits and installations in under served communities.

GOAL 2: Increase outreach and awareness about the benefits of biofuels, available engine upgrade technologies, and the process of regeneratively growing biofuel feedstocks.

GOAL 3: Foster collaboration and engagement with stakeholders in the transportation and renewable energy sectors.

GOAL 4: Evaluate the performance and effectiveness of the engine upgrade technologies and fuel cost savings of families and community members.

GOAL 5: Document and disseminate best practices and lessons learned from the project.
