

## The Campus Proposal

COR Campus is an incubator for material recovery, recycling, and remanufacturing businesses. With SecondMuse and CSI, it will make this mission international in scope, bringing leaders in circularity to Portland.

**3rd Place:** Campus will nourish this federal tax credit area with green jobs

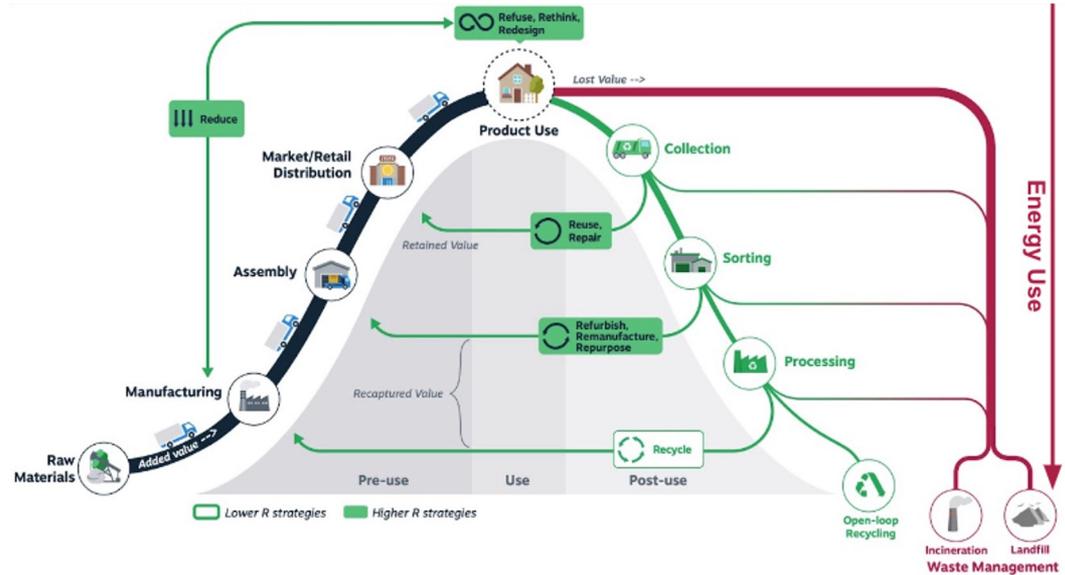

**SPACE:** WasteEntrepreneurs need space for materials, process and product

**ENERGY:** Reuse of material lessens embodied energy

**TRAINING:** SecondMuse to adapt their programming for PNW & WasteEntrepreneurs

COR Campus seeks to capture material quickly in the cycle and reuse that material to reduce the total embodied energy in new products
