

RePOD: A Cleaner Tomorrow Through Container Reuse

The Problem

- Almost 70% of plastic is sent to the landfill
- Packaging is treated with a Single Use Mentality
- Recycling degrades plastic quality

Supporting Our Communities

- Earn credits by returning containers to RePOD collection points
- Donate credits to finance local social and environmental efforts
- Credits redeemed for cash

Our Solution

Helping the Environment

- Each container reused means one less container produced – reducing plastic waste and CO₂ emissions
- Plastic containers may be reused up to 25X

Value In Partnerships

- Help our partners meet environmental goals with refillable packaging
- Alternative supply chain independent of plastic pricing
