

# Stardust Regional Reuse Center

A large scale facility, centrally located incorporating reuse, repair, refurbish, remanufacture and repurpose concepts. The Center will provide access to reusable materials for all community members by increasing inclusion in reuse based activities, education, and workforce development. Significant economic benefits will be realized through improving ease of material donation and reuse retail operations that ultimately reduce waste and improve environmental quality. In addition the Center will provide opportunity to educate the community in the benefits of reuse, repair, refurbish, remanufacture and repurpose through targeted events, workshops and tours.
