WHAT WE DO

Regenerate integrates solar energy generation with regenerative agriculture, using a proprietary AI model to optimize land use. **Our turnkey agrivoltaic solution tackles both food security and clean energy challenges without compromising.**

PROGRESS

Secured **pilot implementations** in upstate New York for H1 2025
Winner: Harvard Spark Grant, NASDAQ Milestone Makers

IMPACT

Energy & Agriculture: Increase in renewable energy generation and regenerative agricultural productivity (+30% efficiency increase)
Sustainability: Carbon sequestration, biodiversity improvement, and resilient infrastructure for underserved regions
125 million metric tons CO2 potential impact

REGENERATE

Scaling Agrivoltaics for Renewable Energy and Sustainable Agriculture
