# Technical Assistance request

As this is a software related project, I would need assistance with software developer or venture funding companies who can provide advisory, connection and software engineer.

Advisory:

On this model, the need of strategy to start can be so helpful for making the solution scale and be successful.

Technical Assistance request

CONNECTION:

To be more specific what I need would be connection to solar marketplaces and design portability of the solar system that is available or can allow us to collaborate, so that soft cost can be cleared or make light cost.

SOFTWARE DEVELOPER:

It is clear this is a software related project. The need for technical coding assistance will be required.
