

We are in the midst of an **energy transformation**, driven by the urgency of **climate change** and a global population reaching **9 billion** by 2050.

Electric Vehicles will be 20% of the global vehicle fleet by 2030

To accelerate adoption, we demand a new Relationship between **Energy** and **Mobility**

New Tools of Engagement are needed

Bodhi EV+ bridges the gap between energy production, consumption and mobility to engage the 21st century Prosumer.
