

SOLAR TESTING

Our rapid growth plan consists of three stages. Monies will be used to boost production of the drone nest into reality and create a platform for other tech innovators to leverage off.

1

REFINE & SCALE

In Phase One we will refine the Products inner workings

Major Milestones

- Redesign on connection charging
- Refinement of manufacturing processes

2

OPEN FOR INNOVATION

Phase Two will build on the robotics for changing batteries in and out of the pole

Major Milestones

- Software testing
- Hardware testing via Lab to confirm safety and energy efficiency
- Integration into multiple drone platforms

3

EXPANDING THE UNIVERSE

In Phase Three our focus will be to enter new international markets and replicate our manufacturing process in several new key locations. We will also expand production capabilities for the drone nest

Major Milestones

- Sales to military
- Sales to commercial drone
- Remote app control & monitoring
