

JKV Engineering offers a simple, cost-effective, easy-to-install, easy-to-purchase, and easy to understand 2-axis tracking solar array. We want to increase adoption of PV systems by offering a plug and play system at a cost that is comparable to other home appliances. Simultaneously we want to help people realize that the ROI is in improved public health, grid resilience, enabling other clean technologies, as well as personal and national energy security.

Main Features

- 2-axis tracking.
- Robust design.
- Attractive Construction
- 2kw blocks of energy.
- Expandable. (save cost on additional units)
- 1-day easy installation with DIY option.
- Non-destructive, small footprint.
- Easy permitting.
- Standard design.
- Re-locatable

Web/App Integration

- Energy usage tracking.
- Solar production statistics.
- Tracking system control.
- System Parking control (for extreme weather.)
- Social integration.
- JKV community usage.
- Goal tracking.
- Custom alerts and usage reminders.
- Remote access.
