

## Ultra High Temperature Logging Tool for Geothermal Wells

- DNV-GL, Rapid Prototypes and GeoTex Design Solutions are partnering to change the Geothermal Logging Game
- Through research, materials science, advanced additive manufacturing techniques and electromechanical design, our team will bring a new generation of logging tools to better develop our Geothermal Resources

### Proposed Specifications

Max Temp	400°C
Time at Max Temp	10 hours
Maximum Pressure	10kPSI
Sensors	Pressure & Temperature
Accuracy	10PSI / 1°C
Tool OD	6"
Tool Length	5ft
Deployment	Wireline & Slickline
Power Supply	Wireline, Battery, Energy Harvesting
