

Flamingo SUMMARY SLIDE

PROBLEM - LONG INSTALL TIMES

The current average time for solar projects to go from contract signing to installation is lengthy. This can cause mistakes and reduce customer enthusiasm.

INNOVATION - THE FLAMINGO APP

Flamingo will increase back office workflow efficiency and improve customer experience industry wide. This will allow companies to focus on installing more solar.

TEAM - THE FLAMINGO CREW

Our current team is two back-end developers, two front-end developers, and one designer. We are a well oiled, highly motivated, and goal oriented unit.

PLAN - REACH MVP AND BEYOND

We plan to reach a Minimum Viable Product in 180 days. After reaching M.V.P. we will work to implement a range of comprehensive app elements and options.
