Project Title: Multi-Functional Industrially Integrated Solar Panel Array Platform

- Purpose: To win the Solar Prize Competition sponsored by the United States Department of Energy.
- Problem: The current Global Economy does not maximize the capacity of highly efficient solar energy production operations to support clean/renewable electricity generation.
- Solution: Provide and secure the most efficient/sustainable process of solar energy into electricity.

## Project

## **Resources:**

- Submit technology concepts/business plans to various
  Organizations that support Solar Energy.
- United States Department of Energy and Department of Commerce
- Academic Institutions and Associations for student and industry engagement.
