

Verdigris delivers energy AI & automation for the world's smartest buildings

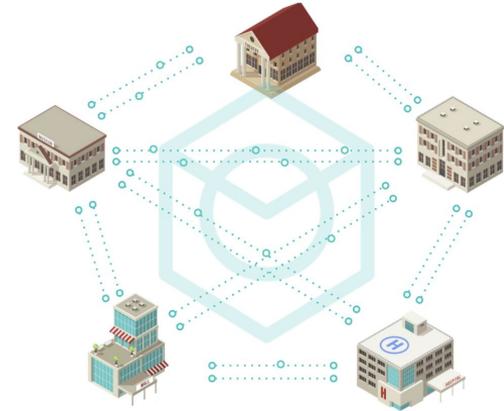

IoT energy meters & AI-enriched data streams

Energy analytics & automation

Grid-interactive network of buildings

Capture highly-granular data down to the circuit level

An up-to-date source of truth, even as your building changes

Flexible data integrations and APIs

AI-enhanced analytics provide insights you can act on

24/7 continuous optimization of building controls

Reduce energy consumption and save money effortlessly

Supply flexible power back to the grid when it needs it most

Significantly lower leveled cost of energy (LCOE) than lithium energy storage
