

# Title:

## SOYOS AC/DC CLEAN ELECTRIC GENERATOR (SCEG)

---

**Team Name:** IRIDCCS LLC Independent Research Innovations and Developpement Climate Change Solutions.

**Short Description:** SCEG is an innovative new technic with the alignment of coil wire and magnet generating electricity from low to high voltage without the input of traditional energies with CO2, nuclear, wind, solar, hydraulic, tidal energies. This new Clean Electric Power Generation with innovative distribution design of coil wire and magnet uses advanced technics producing electricity from low to high power through an ingenious system insert with Clean Energy with zero Carbon emission.
